SOFFIT CEILING

BROWN

SOFFIT

WOOD COLOR

The system was designed with both functionality and aesthetics in mind. Thanks to the click lock and the increased rigidity of the panels, installation is quick and easy. The product is waterproof and keeps pests out. It is easy to keep clean and resistant to biological corrosion. The semi-matte surface and the structure of the panels perfectly imitate wood patterns, and the specially selected colour scheme allows you to match them to various home interiors and surroundings.

VINYL SLIDING SYSTEM

Ash

Honey Oak

Golden Oak

The Vinyl Sliding system is the result of the search for the ideal facade system, which is endowed with the advantages of both vinyl and metal siding and at the same time eliminates their disadvantages. Thanks to the use of our innovative, three-layer technology the Vinyl siding panels have high resistance to mechanical damage, previously available only for metal siding and high resistance to low and high temperatures. At the same time, unlike metal coverings, Vinyl sliding is much easier to process and install, and during use it does not corrode, and retains its color longer. The facade does not require specialist maintenance and painting.
